ENA TrustBackup℠

# A Secure Backup and Storage Solution You Can Trust

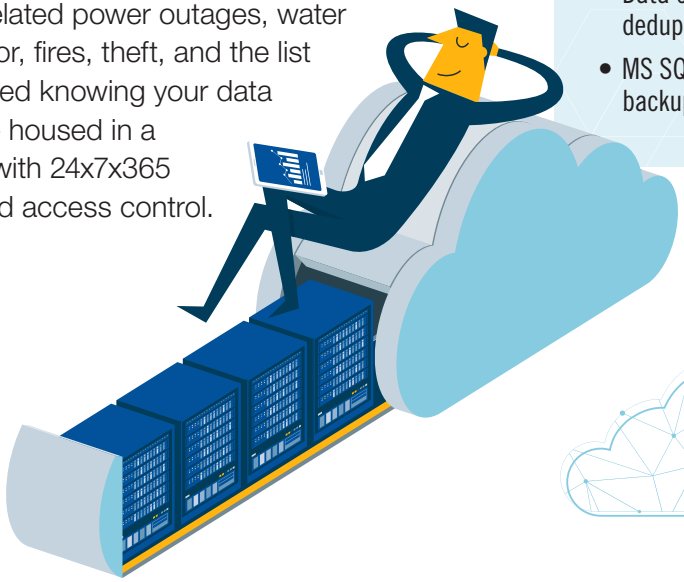
**ENA TrustBackup is a comprehensive file backup solution that protects users against data loss that could result from operational mishaps, natural disasters, or malicious cyber threats. ENA TrustBackup keeps your backup data safe and accessible in ENA's cloud.**

## Ensure Your Data Is Protected With ENA TrustBackup

**Secure data backup and storage** – ENA TrustBackup allows you to schedule backups and store data backup within ENA's secure cloud environment.

**Encrypted Data** – ENA TrustBackup's advanced encryption standard (AES) 256 bit data encryption ensures security and data privacy in transit and at rest. All data is encrypted before it is transmitted to ENA's cloud environment.

**ENA Enterprise-Grade Support** – Emergencies happen—weather-related power outages, water damage, human error, fires, theft, and the list goes on. Rest assured knowing your data and applications are housed in a secure data center with 24x7x365 surveillance and card access control.

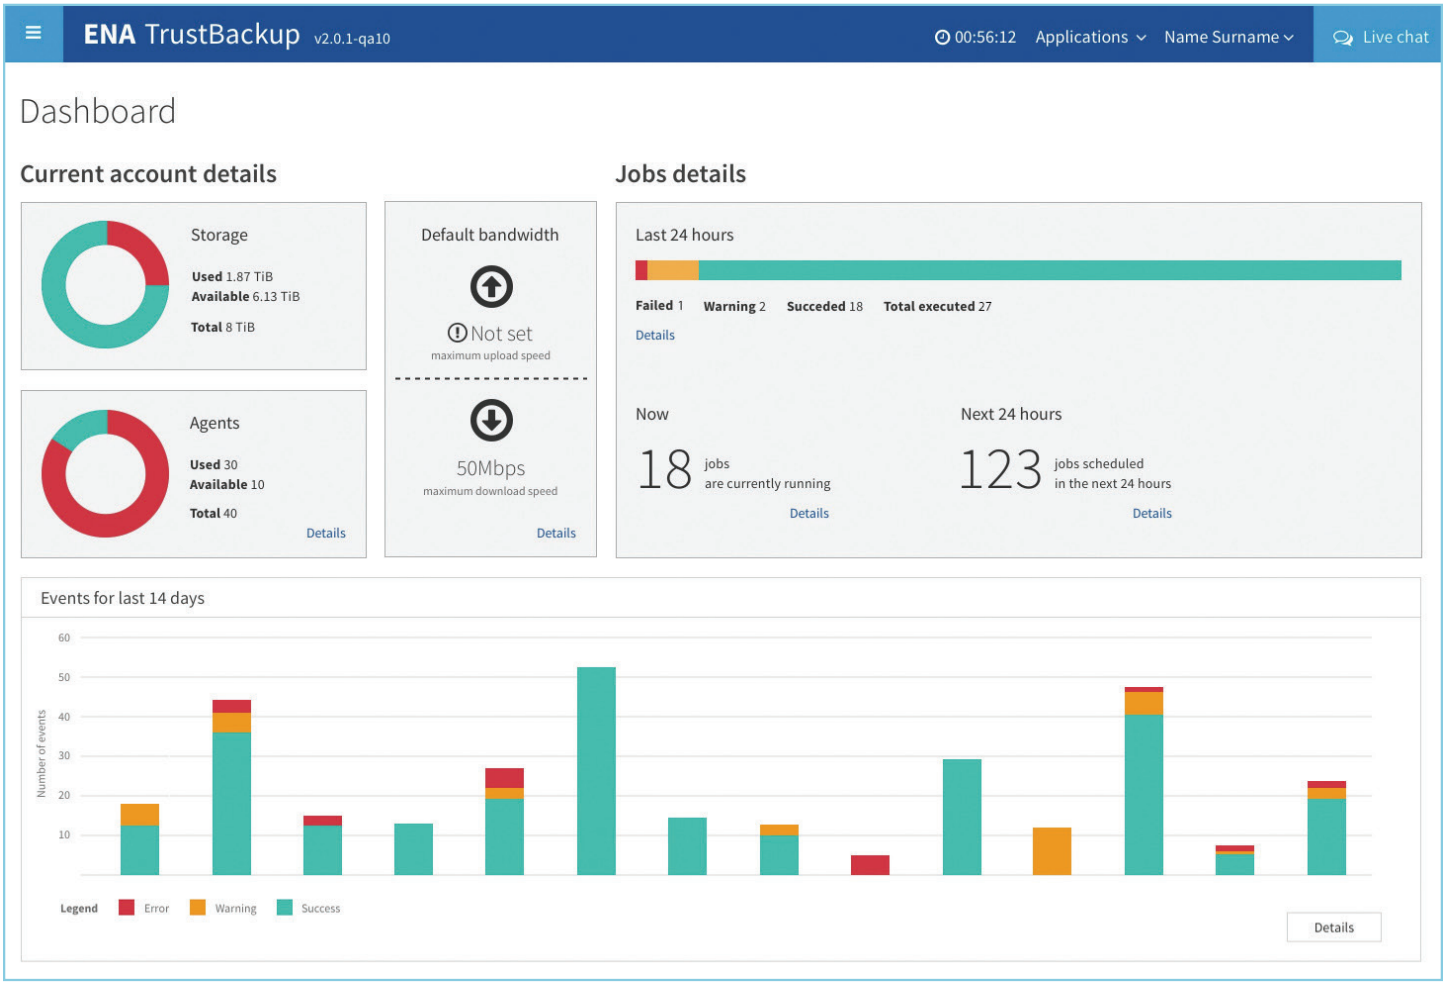


### Comprehensive Features

- Flat-rate predictable billing
- Flexible administrative interface for creating and managing backup jobs, schedules, and restoration activities
- Backup jobs feature enables users to efficiently manage multiple devices with similar file structures
- Throttle capability allows users to control bandwidth usage
- HIPAA-compliant, secure cloud-based backup storage
- Data compression and deduplication
- MS SQL Server database backup

## ENA TrustBackup Dashboard

The ENA TrustBackup dashboard allows you to easily view and schedule account details.



## ENA TrustBackup Comes With ENA's Exemplary Support!
