

## MANAGED IOT CONNECTIVITY FOR HEALTHCARE

Connect and control your devices and data for better health monitoring and improved patient care.

Internet-connected devices and sensors are an essential and growing component of quality healthcare. Providers and medical device manufacturers must maintain secure and reliable wireless connectivity and use the right management tools.

Kajeet's Medical IoT Connectivity combines our cost-saving wireless connectivity, industry-leading IoT management platform, and hardware solutions for better health monitoring, improved patient care, and guaranteed compliance with government mandates for Medicaid and other health programs.

-  Patented IoT management platform
-  Malware blocking and threat protection
-  Plug-and-play or customizable IoT setup
-  Real-time data usage per line
-  Open APIs for easy integration
-  Works on any cellular device!

## Kajeet Healthcare Solutions

OPTIMIZED CONNECTIVITY	IOT MANAGEMENT PLATFORM	LTE NETWORK FAILOVER	DEVICE AND HARDWARE SUPPORT
Multi-network access from all the major North American networks and shared data across devices and networks	Extensive controls and complete visibility into devices and data usage	Data-only LTE network failover to keep critical systems running in the case of an outage	Ready-to-use, preloaded devices takes the hassle out of deploying an IoT launch

### GETTING STARTED IS EASY:

1. Choose your network.
2. Choose your term length.
3. Choose your data plan.
