

Packages and Features

Contact Center SolutionsSM

ENA's contact center solutions are designed to meet the daily call center and contact center needs of your organization. A powerful add-on solution to ENA's voice and UCaaS services, our three contact center packages offer robust feature sets that enable organizations to deliver high-quality service interactions and experiences via phone, chat, SMS, and email.

Integrated Contact Center Basic is the ideal package for organizations needing essential basic call center functions including multi-line hunting with queueing, automated supervisor reports monitoring agent activity, and dashboard views with real-time queues, analytics, and statistics.

Enhanced Contact Center Gold is designed for organizations needing a more robust, feature-rich contact center application. Delivered in partnership with Intermedia/Telax, our Gold package offers interactive voice response (IVR), skill-based call routing, historical reporting, and the option to add full omni-channel capabilities to take the conversation beyond just voice.

Enhanced Contact Center Platinum is for organizations looking to deliver the ultimate experience with a fully featured omni-channel contact center solution. Delivered in partnership with Intermedia/Telax, our Platinum package is designed for sophisticated contact center needs providing exceptional performance bolstered by built-in omni-channel, custom integrations, inbound/outbound capabilities, scheduling management, workforce optimization, and much more.

Contact Center Solutions™ Package Features

FEATURE PACKAGE	BASIC	GOLD	PLATINUM
Max Calls in Queue	256	3 calls per agent license	3 calls per agent license

Requires additional supervisor license	•		
Requires additional auto attendant license	•		
Per concurrent agent license required		•	•
Per queue license			
Per supervisor license	•		
M&S included in license price		•	•

À La Carte Add-On Features

Want access to Platinum-level features without upgrading? Enhance your Gold package with our à la carte feature add-ons.

GOLD+ FEATURE	DESCRIPTION
Gold+ Chat Queuing	Chat Queuing is a feature you can add to your website or Content Management System (CMS) to allow real-time online exchanges between your support Agents and your customers. Incoming chat is presented to the Agent via the Client Communications Agent (CCA). Chat Queuing supports pre-configured text responses that the Agents can select to reduce typing time.
Gold+ Email Queuing	Inbound Email Queuing allows customers to email a pre-configured email address that is associated with an email queue. The incoming email is presented to the Agent via the CCA.
Gold+ Dynamic Notification	Dynamic Notification is a tool that allows you to manage your dynamic notification campaigns. These can be classic reminder campaigns (with reminders such as “you have an appointment with Dr. Smith on Tuesday, July 28th at 11 am”) or direct sales campaigns with a return-to-Agent option. Dynamic Notification supports voice, SMS and email reminders.
Gold+ Scheduling Manager	Schedule Manager allows you to optimize scheduling, staff levels, workloads, and campaign timetables for your call center Agents.
Gold+ Agent Evaluator	Use the Evaluator tool to evaluate voice and chat interactions between Agents and customers. You can evaluate how Agents are talking to customers, whether the messages are being delivered in the manner you want, and if company procedures are being followed.
Gold+ Self-Serve IVR*	Self-Serve IVR allows you to build applications into the Interactive Voice Response (IVR) to allow customers to obtain information and complete tasks such as “Pay my Bill”, etc.
Gold+ SMS	Inbound SMS to Chat allows customers to use a registered SMS number to initiate a chat session with an Agent. Incoming chat is presented to the Agent via the CCA in the same manner as a regular chat is presented.

*Self-Serve IVR may require an SOW depending on the complexity and amount of time required for the project. Contact your account manager for more information or pricing.

ENA delivers transformative connectivity, communication, cloud, security, and data analytics solutions supported by exceptional customer care. For more information, please visit www.ena.com, call 866-615-1101, or e-mail info@ena.com.
