

Reliable and Flexible SD-WAN Services Designed Just for You

Get The Most From Your Network

SD-WAN technology empowers your community to intelligently manage network traffic by taking advantage of all available connectivity options. We work with you to design a custom network that keeps all your essential devices connected.

So whether you run two sites or hundreds, our SD-WAN solution optimizes your Internet Access to provide dependable connectivity across your campus—all without sacrificing data security.

SIMPLIFY Your Network

- Low touch provisioning and configuration
- 24x7x365 ENA monitoring
- World-class customer support

OPTIMIZE Your Network

- Optimize application performance
- Balance and prioritize network traffic across sites
- Consolidate monitoring and visibility across all sites

RELY on Your Network

- Build in automatic redundancy capabilities
- Support multiple WAN interfaces from multiple provider types

SECURE Your Network

Choose from three security service level options:

- **Router Service** – IPsec encryption transport
- **ENA NetShield Firewall Service** – Hosted firewall service that utilizes industry-leading security architecture to mitigate threats at our core
- **ENA NetShield UTM Service** – A scalable unified threat management solution that consolidates multiple security and network capabilities into a single reporting service

5 Reasons to choose ENA SD-WAN

- World-class engineering & support
- Security options to meet your needs
- Ensure network reliability
- Seamless deployment and service
- Cost-effective, USAC-eligible service options

About ENA by Zayo

ENA delivers transformative connectivity, communication, cloud, cybersecurity, and technology services. Our 99% customer satisfaction rating and world-class net promoter score (NPS) demonstrate our commitment to delivering exceptional customer care.
