

ENA Security Threat Matrix

I'M CONCERNED ABOUT...	...SO I NEED...	...TO BETTER...
Hackers stealing financial data and personally identifiable information	Security Assessments	Identify holes and vulnerabilities through which data could escape.
Phishing and ransomware attacks	ENA TrustBackup ™  ENA TrustVault ™  ENA NetShield UTM ™  Security Assessments	Create reliable, layered backups of my data to mitigate the painful recovery from and cost of ransomware. Identify holes and vulnerabilities in access controls, patch management, user education, and more.
How to gain visibility into what's happening on my network	ENA NetShield UTM ™   An ENA Affiliate	Customize policies based on app type, user type, traffic origin, and more, supported by custom analytics and reporting. Gain total visibility into the active applications on my devices.
How to design and implement security practices that future-proof my network	ENA NetShield UTM ™  Security Assessments	Lay a strong security foundation with deep network visibility, intrusion protection, malware protection, and more to prioritize risks, build a plan, and achieve my security goals.
DDoS attacks disrupting my community's essential processes	ENA NetShield UTM ™  ENA Internet Access ™  ENA NetDefender ™ 	Block all known botnet threats trying to penetrate my network. Mitigate attacks using blackhole routing. Scrub away attack traffic with no break in connectivity.
Protecting my organization from intrusions	ENA TrustCompute ™  ENA NetShield UTM ™ 	Monitor and control access to my computing and data assets. Identify and protect against known intrusion signatures.

ABOUT ENA

ENA is the leading provider of technology solutions to education communities and libraries. Since 1996, we have worked with our customers to ensure they have the robust and reliable connectivity, communication, cloud, security, and software solutions they require to meet the present and emerging technology needs of the communities they serve.
