

Reimagine Your Data Center Strategy

ENA TrustCompute is our comprehensive, easy-to-use, and budget-friendly Infrastructure as a Service (IaaS) cloud computing solution delivered to communities as a scalable, reliable, and secure virtual private cloud (VPC).

Experience the ENA TrustCompute Difference

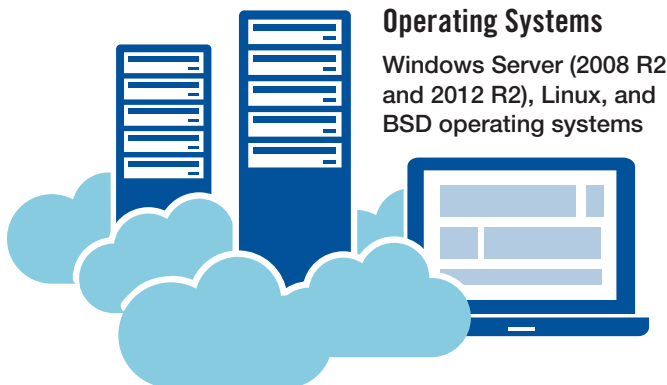

Complete Cloud Solution – ENA TrustCompute’s VPC architecture delivers the flexibility and scalability of public cloud with the privacy, security, and predictable billing benefits of private cloud.

Infinite Scalability – Our simple and flexible resource bundles can be allocated as needed, enabling you to purchase what you need now with the ability to scale up quickly and easily.

Easy-to-Use Interface – Designed to reduce the complexity of cloud computing, ENA TrustCompute’s simple and intuitive interface enables users to quickly create virtual machines, rapidly deploy applications, and allocate computing resources as needed.

All-Inclusive Packages – Our innovative, all-inclusive packaging means you never pay extra for ingress/egress traffic, data requests, load balancers, advanced web security, ENA’s world-class customer support, and more.

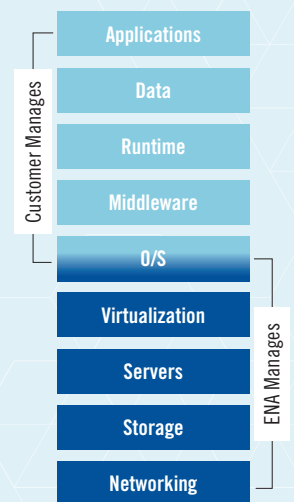

Flat-Rate, Predictable Pricing – Unlike other utilization-based, hyper-metered cloud solutions, ENA TrustCompute’s non-metered, flat-rate packages are 100% predictable with no hidden costs or fluctuating fees.

Unleash the power of IaaS cloud computing

- Increase capacity with zero footprint in your buildings
- Deploy virtual servers quickly and easily
- Eliminate costly server infrastructure refresh cycles
- Ensure operations continuity with 24x7x365 remote access to critical systems and data
- Build highly resilient, agile infrastructure
- Transition from capex to a stable opex model
- Eliminate ongoing maintenance and physical security costs

Infrastructure as a Service with ENA TrustCompute

Why choose ENA TrustCompute?

- **Fast and easy** – Quickly create virtual machines on demand
- **Disk snapshots** – Minimizes risks associated with software upgrades
- **Dedicated IaaS available** – ENA also offers dedicated ENA TrustCompute for optimal performance and data privacy
- **Reduce overhead costs** – Eliminates the unpredictable and costly repair, power, and cooling expenses associated with maintaining traditional on-site servers
- **Reliable and available** – Always-on virtual server platform
- **World class support** – 24x7x365 support from our Customer Technical Assistance Center (CTAC)

ENA TrustCompute delivers optimal data center security in virtual environments

Platform security

- As a HIPAA compliant Business Associate, our ENA TrustCompute platform is designed with safeguards required to protect and secure personal information
- ENA Internet Access customers enjoy a direct private connection to their cloud via ENA's Internet backbone
- ENA TrustCompute utilizes Internet Protocol Security (IPsec) to encrypt traffic flow over the public Internet for off-net customers
- Logical separation of customer cloud computing environments

Security enabling features for customer environments

- Compatibility with customer encryption solutions
- Ability to leverage Cloudflare's content delivery network (CDN) with DDoS mitigation and web application firewalls (WAF) for websites at no additional cost
- Customer defined and administered firewalls
- Default "security first" configuration
- Tiered network architecture option for network segmentation

ENA TrustCompute technical features

- User-friendly and intuitive interface and dashboard
- Integration with ENA's user portal
- Self-service networking configuration and control
 - Customers retain full control of servers and the allocation of resource bundles
 - Full customer visibility, accessibility, management, and control
- Pre-configured application stacks make it easy to deploy open source and other applications
- Load balancing, static NAT, port forwarding, firewall services, and access control
- VM performance monitoring
- Choice of operating system
- Education pricing for Windows Servers available to education institutions
- VM migration assistant

ENA TrustCompute package options give you the flexibility you need

ENA TrustCompute offers simple and flexible resource bundles. Service add-ons enable you to tailor your memory, storage, and virtual CPU core quantities to meet your specific needs. ENA will work with you to assess and define your resource needs based on your data center strategy.

BUNDLE	Memory (GB)	Storage (TB)	Virtual CPU (Cores)
ENTRY LEVEL	40	1.5	16
SMALL	80	2.5	32
MEDIUM	160	5	64
LARGE	320	10	128
X-LARGE	640	20	256
