

Stop Inappropriate Content—Start Learning and Start Discovering

ENA WebSafe is made for schools and libraries, with input from schools and libraries

ENA has been providing cost-effective, cloud-based content filtering since 1998. We have listened to customers' needs and incorporated their priorities, resulting in a powerful and flexible solution that maximizes security, provides customers with the tools they need to ensure CIPA compliance, and minimizes administrative burden—all while putting school districts and libraries in the driver's seat.

You have complete control

ENA WebSafe's popular and proven Authorized Override service continues to offer authorized administrators and educators the ability to bypass category restrictions.

Our comprehensive content filtering solution enables school districts and libraries to choose which content categories to block or allow (there are over 50 categories that organize websites by subject matter), to input specific websites for whitelisting or blacklisting override, and to view and download utilization reports.

ENA WebSafe features include:

- Authorized Override functionality and online administration
- No need to purchase or maintain any premises-based equipment
- Complete online, real-time control of category selection, as well as blacklists and whitelists
- Export report data to a CSV file for all report types
- Bulk add URL overrides individually, or in multiples, easily and conveniently via manual entry, copy/paste, or CSV file import
- Robust admin controls, analytics, and reporting
- Customer management of HTTPS filtering on port 443

Contact your ENA account service manager for more information.

ENA WebSafe, ENA's next-generation content filtering solution, gives schools and libraries:

- A proven solution that's extremely fast, scalable, and flexible—our fastest filtering engine yet!
- Complete control over your filtering policy including customized blocking
- Cloud-based content filtering
- A robust safety net for students while giving them access to the valuable learning opportunities of the Internet
- The ability to comply with CIPA while respecting user decisions and first amendment freedoms
